Harsh environment connector - Push the limits Test the only really corrosion resistant version now!

These new housings are dedicated especially to applications, where salt mist is a challenge for the components. They fit very well into extreme harsh environment applications like intervehicle connections, brakes, power supply and bogies.

Hyperbolic Contact Technology

Are you tired of troubleshooting messages and error codes, due to cable failure?

With traditional contact system design, failure is inevitable when confronted with CONTINUOUS FREQUENCY VIBRATION, TEMPERATURE CYCLING, ENVIRONMENT FLUCTUATIONS and CORROSION. With a little forward thinking and design, Amphenol is proud to offer you a better solution: RockSolid™ Connections.

Key Benefits:

1. Immunity to Shock and Vibration
2. Low Contact Resistance
3. Low Insertion and Extraction Forces
4. Longer Contact Life
